Investment overview

OBJECTIVE

To preserve the value of your investment, while achieving a return in line with money market rates by investing responsibly in issuers that incorporate environmental, social and governance ("ESG") criteria.

PORTFOLIO ASSETS

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management. It may also use structured products to gain exposure to certain assets.

INVESTMENT PROCESS

The investment manager uses a combination of market and issuer analysis to identify those securities that offer the best performance in light of interest rate trends. To begin with, investments in issues from companies considered incompatible with the responsible investment policy are excluded. In addition, the Compartment's active management approach uses strict risk controls, favouring issuers with high ESG scores.

Risk considerations

The Unit Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Unit Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the following risks which are not adequately

captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.

- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.
